COLOMBIAN NDC – 20% of reduction of our GHG emissions in 2030

¿CUÁL ES LA CONTRIBUCIÓN?

META UNILATERAL E INCONDICIONADA

Colombia se compromete a reducir sus emisiones de gases de efecto invernadero en un 20 % con respecto a las emisiones proyectadas para el año 2030.

META DE REDUCCIÓN DE EMISIONES

Reducción del 20% respecto al Escenario BAU

EFFICIENT USE OF RESOURCES

INFRASTRUCTURE INVESTMENT

INNOVATION

TRANSFORMATION OF PRODUCTIVE SECTOR

New Business

New ways to generate profits.

New Economic Instruments.

High efficiency economies

Approximately 700 million of tones CO2-eq in the period 2015-2030

...and all of this needs to be measured, tracked and reported in a transparently and verified manner.

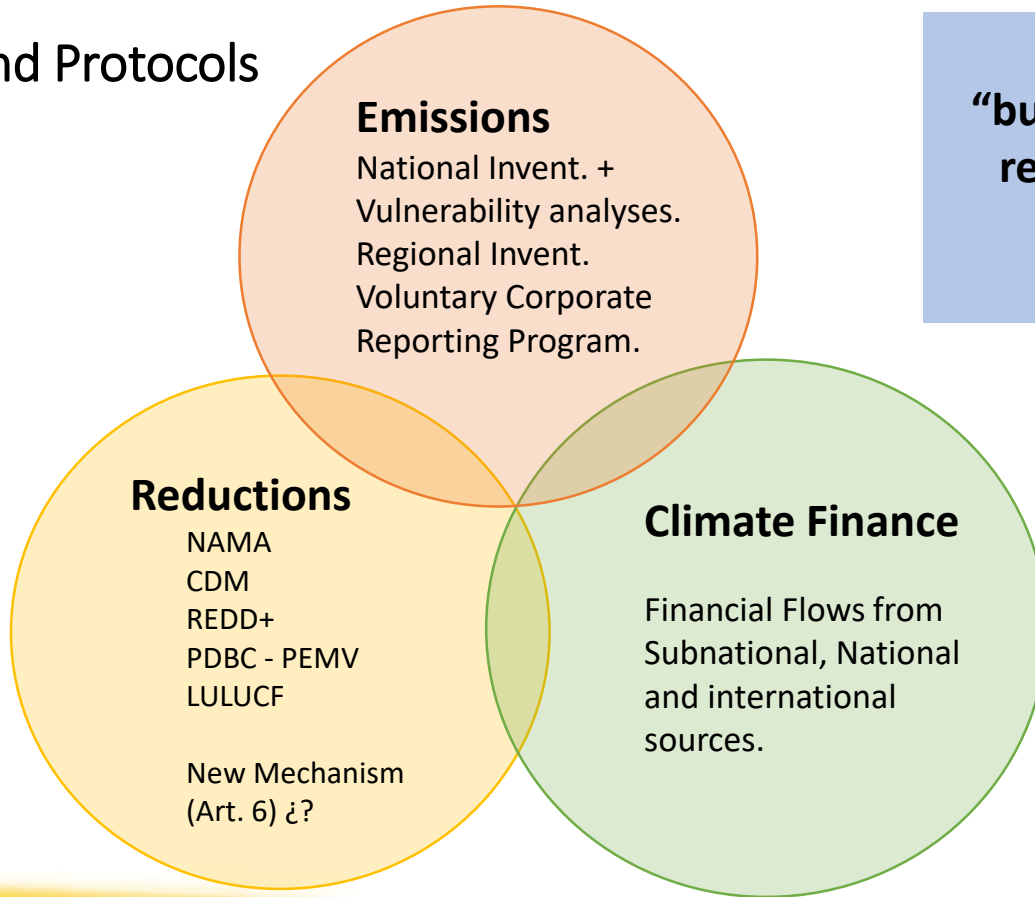

MRV Scopes

Guidelines and Protocols

IPCC Guidelines
GHG Protocol
ISO 14064

- UNFCCC guidelines for MDL and REDD+
- Guidelines for low carbon development projects, projects eligible for voluntary markets, NAMAS and projects in the LULUCF sector.

*Colombian Standardization Organization.

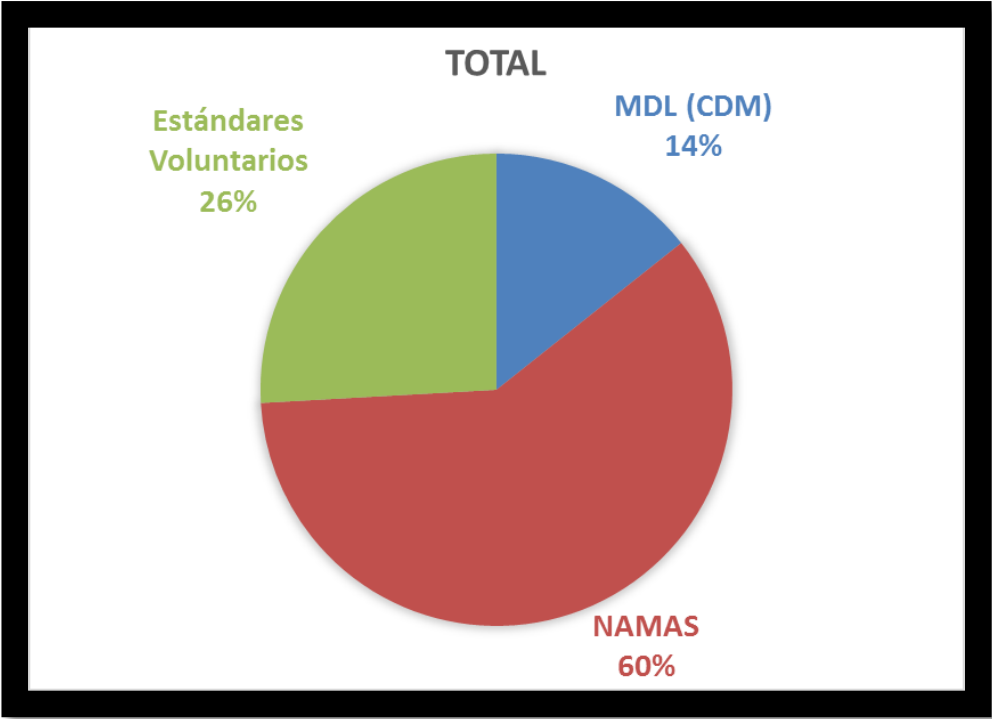

Common factor:
“building indicators and report co-benefits in mitigation and adaptation”.

Guidelines for the identification of financial sources.

Developed for governors, mayors, and project developers.

About reductions potential ...

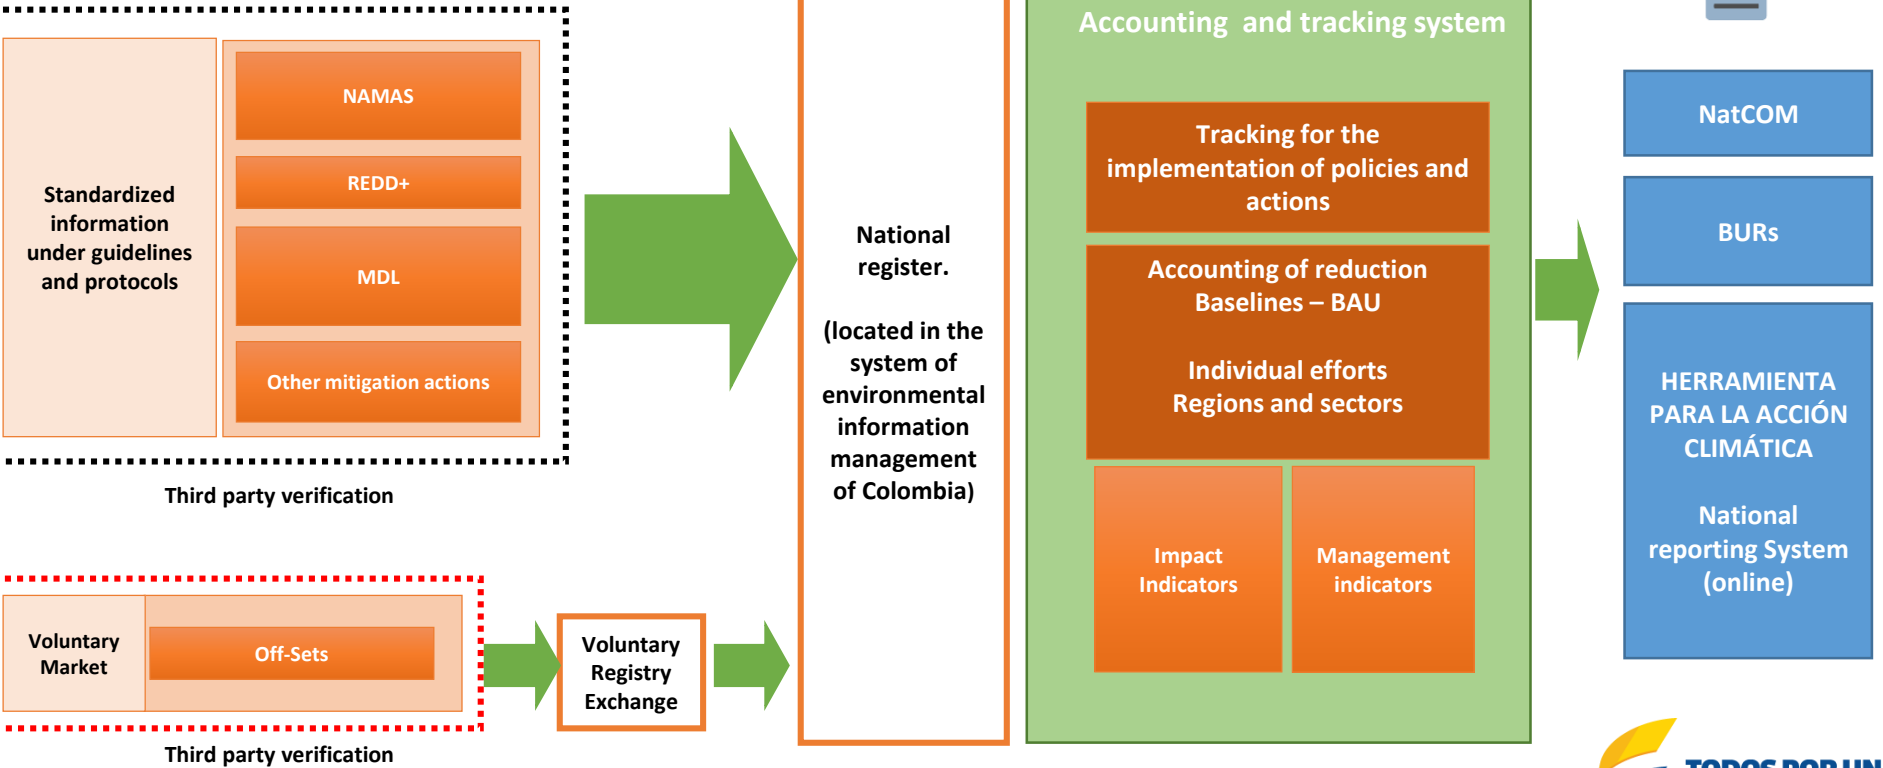

Reduction initiatives identified	Total reductions accumulated in 2030 Million ton CO2-eq
MDL (CDM)	74
NAMAS	307
Voluntary Standards (Off-sets)	134
Total	515

We need to register all of them!

Which of them can be transferred internationally? ... at this time we do not know.

National Register of GHG reductions... Under construction.
